DETAILED ACTION

1. Applicant's election of Group V, Claims 10, 11, 14, and 15, with traverse, in Paper No. 10, filed 10/28/02 is acknowledged. Applicant argues that the Examiner has provided no reason or showing that a serious burden would result from the examination of human and murine polypeptide, or human and murine nucleic acid claims together. Applicant is advised that because the application was filed as a national stage PCT application no demonstration of serious burden is required. The application has been restricted under the rules for restricting national stage PCT applications as set forth in Chapter 1800 of the M.P.E.P., not the rules as set forth in Chapter 800 of the M.P.E.P.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-9 and 12-13 are withdrawn from further consideration by the Examiner, under 37 C.F.R. § 1.142(b) as being drawn to nonelected inventions.

Claims 10, 11, 14, and 15 are being acted upon.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claim 14 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Martin et al. (1997).

Martin et al. teaches a fragment of SEQ ID NO:3 (see sequence search).

The reference clearly anticipates the claimed invention.

5. Claim 14 is rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by U.S. patent No. 5,861,244 (1999).

The '244 patent teaches a fragment of SEQ ID NO:3 (see SEQ ID NO:14).

The reference clearly anticipates the claimed invention.

6. Claims 10, 11, and 15 are allowed.

7. References AQ, AS, and AU on the Form 1449, filed 10/05/01, have been lined through and have not been considered because they have not been received by the Examiner.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (703) 308-9805. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone numbers are 703-872-9306 (before final) and 703-872-9307 (after final).
